

WATER RETENTION AGENT

Reference : RETENDEAU

Go on vacation with peace of mind!

Collect and exploit information on the applications of the structure of certain molecules (superabsorbents, surfactants, alginates, etc.).

Small granules that can absorb and return up to 200 times their dry weight in water.
250 g bag.

Practical application: reduces the frequency of watering plants! Simply mix the granules with the potting soil (5 g for 5 kg of soil).
