

WIRELESS CURRENT SENSOR

Reference : PS-3212

No interface
Wireless or USB
100 kHz in USB

Measurement of electrical current up to 1 A, with overcurrent protection of the sensor.

Technical characteristics:

- Measurement range: ± 1 A
- Sampling frequency:
 - Up to 1000 Hz in Bluetooth
 - Up to 100 kHz USB
- Input impedance: 0.1 Ohm
- Battery: rechargeable lithium polymer, battery life of about 3 months
- Connection: USB cable or Bluetooth 4.0
