

XSZ SERIES POLARISING SEMI-PLAN

Reference : XSZPOLMONO

Monocular

Top range halogen polarizing microscope, available in monocular, binocular or trinocular version, with dioptric adjustment on a tube (except for the monocular).

- 4 10x / 22mm eyepieces are supplied: 2 standard, 1 reticulated and 1 micrometric, as well as 2 eyecups.
- Vertical revolver holder - 5 places: delivered with 3 semi-plan objectives: 4x, 10x and 40x
- Rotating head: 360 ° rotating with valets and double layer.
- Polarizer: mounted in a graduated rotating stand which allows a very easy positioning of the filter and is provided with a rod allowing it to be retracted very easily. It is also equipped with a Bertrand lens, retractable by simply rotating its stand.
- Condenser: linear NA1.25 with iris diaphragm
- Analyser: also placed on a graduated rotating stand, and equipped with a rod to easily retract it. Separated coarse and fine focusing adjustments are coaxial, and a hardness adjustment is available.
- Halogen lighting: also equipped with an iris diaphragm
Finally, its design makes it easy to transport.

- Power supply: 220V with detachable cord.
Blue filter supplied.
Weight: 7.9 kg
